

Joking with dates

Enter a date

9/24/2008

The date you entered is:

Wednesday

<== Hint: use the right date format

Today is

Wednesday 10/1/2008

You were born on:
which was:

10/1/1985

Tuesday

So, today you are

23 years old

<== Hint: this is a difference between two dates, but...

To be more precise, you are
Happy birthday to you!!

23 years

0 months

0 days

old!

<== Hint: use the hidden function DATEDIF

Your next birthday will be:

10/1/2009

<== Hint: day and month are the same, the year instead...

That means that still

365 days and you will be

24 years old!
