

Create a new database named "My video library".

Create the “directors” table, whose structure contains the following data:

- director code
- surname
- name
- date of birth
- nationality

Create the “actors” table, whose structure contains the following data:

- actor code
- surname
- name
- date of birth
- nationality

Create the “films” table, whose structure contains the following data:

- film code
- title

Create the relationships between the tables.

Create a query that shows the titles of the films directed by Italian directors.

Create a query that shows the surnames of the actors directed by Italian directors
