## Lonely hearts pair convicted of Xmas bomb plot

Guilty... the bomb plot pair

**TWO Islamic fanatics were yesterday convicted of plotting a Christmas bomb attack after they met on a dating site.**

Asylum seeker Mumin Mohammed, 37, learned

By TOM WELLS, Chief Reporter

how to make explosives from the same online video manual used by Manchester bomber Salman Abedi. And he used pharmacist Rowalda el-Hassan's know-

ledge of chemicals after meeting her on dating website singlemuslim.com.

Mumin, who illegally smuggled himself into the UK after abandoning his wife in Greece, volunteered for a "lone wolf" IS terror attack. When police raided his Derby home they found

bomb making equipment, mobile phone detonators and the poison ricin. It is thought he was days from attempting an atrocity. Mohammed and mum-of-two el-Hassan, 33, were found guilty of terror charges and will be sentenced later at the Old Bailey.

Warning... ibuprofen

# ibuprofen linked to infertility in blokes

By SHAUN WOOLLER

**PAINKILLER** ibuprofen could make men infertile by shrinking their testicles, scientists warn.

The drug lowers male sex hormone testosterone, which causes blokes' privates to shrivel and leads to fertility problems.

A study of 31 blokes aged 18 to 36 found ibuprofen reduced production of testosterone by nearly a quarter in six weeks.

Overuse of the drug could lead to full-blown hypogonadism - or low testosterone levels - which has been linked to premature death.

Dr David Kristensen, of Copenhagen University, said symptoms include "reduced libido, reduced muscle mass, depressed mood and fatigue".

Ibuprofen is increasingly used by people and athletes for aches, fever and arthritis.
