

What is a wave?

Small perturbations of a **stable** equilibrium point

Linear restoring force

Harmonic Oscillation

Potential energy

What is a wave? - 2

Small perturbations of a
stable equilibrium point

Linear restoring
force

Harmonic
Oscillation

Coupling of
harmonic oscillators

the disturbances can
propagate

What is a wave? - 2

Small perturbations of a stable equilibrium point

Linear restoring force

Harmonic Oscillation

Coupling of harmonic oscillators

the disturbances can propagate, superpose and **stand**

Normal modes of the system

What is a wave? - 3

Small perturbations of a
stable equilibrium point

Linear restoring
force

Harmonic
Oscillation

Coupling of
harmonic oscillators

the disturbances can
propagate, superpose and
stand

WAVE: organized propagating imbalance,
satisfying differential equations of motion

$$\frac{\partial^2 y}{\partial x^2} = \frac{1}{v^2} \frac{\partial^2 y}{\partial t^2}$$

General form of LWE

What is a wave? - 4

Small perturbations of a **stable** equilibrium point

Linear restoring force

Harmonic Oscillation

Coupling of harmonic oscillators

the disturbances can propagate, superpose, stand and be **dispersed**

WAVE: organized propagating imbalance, satisfying differential equations of motion

non linearity

Turbulence

Organization can be destroyed, when interference is destructive

Diffusion

strong scattering

Exceptions

Solitons

Phonons
