

Install Rstan before the next lab

Rstan <https://mc-stan.org/users/interfaces/rstan> is the R interface to Stan <https://mc-stan.org/>.

You have to follow the following <https://github.com/stan-dev/rstan/wiki/RStan-Getting-Started> to install the R package. Then try to run the `stan_prova.R` file in the Lab 3 folder .

If you have some problems with installation write me as soon as possible.
