# Finding the right programmes and calls

Prof. Elisabetta De Giorgi

A.A. 2021-22

# Key elements of EU funding programme

**Framework programmes** are the main financial tools through which the European Union supports research and development activities covering almost all scientific disciplines. They have multi-annual duration. Ex. HORIZON 2020 or HORIZON EUROPE

**Work Programmes** are annual implementation plans that describe the priority topics of each **Framework Programme** that will be funded during a particular calendar year

**Calls for Proposals** are announcements soliciting proposals in certain topics of the Work Programmes:

- ✓ they indicate the **topics** that need to be addressed by the projects
- ✓ the **deadlines** for submission
- ✓ the **type of projects** that can be funded
- ✓ the total **budget available**

**Type of project** means a sub-programme such as the Marie Curie (MSCA) within the Horizon FP

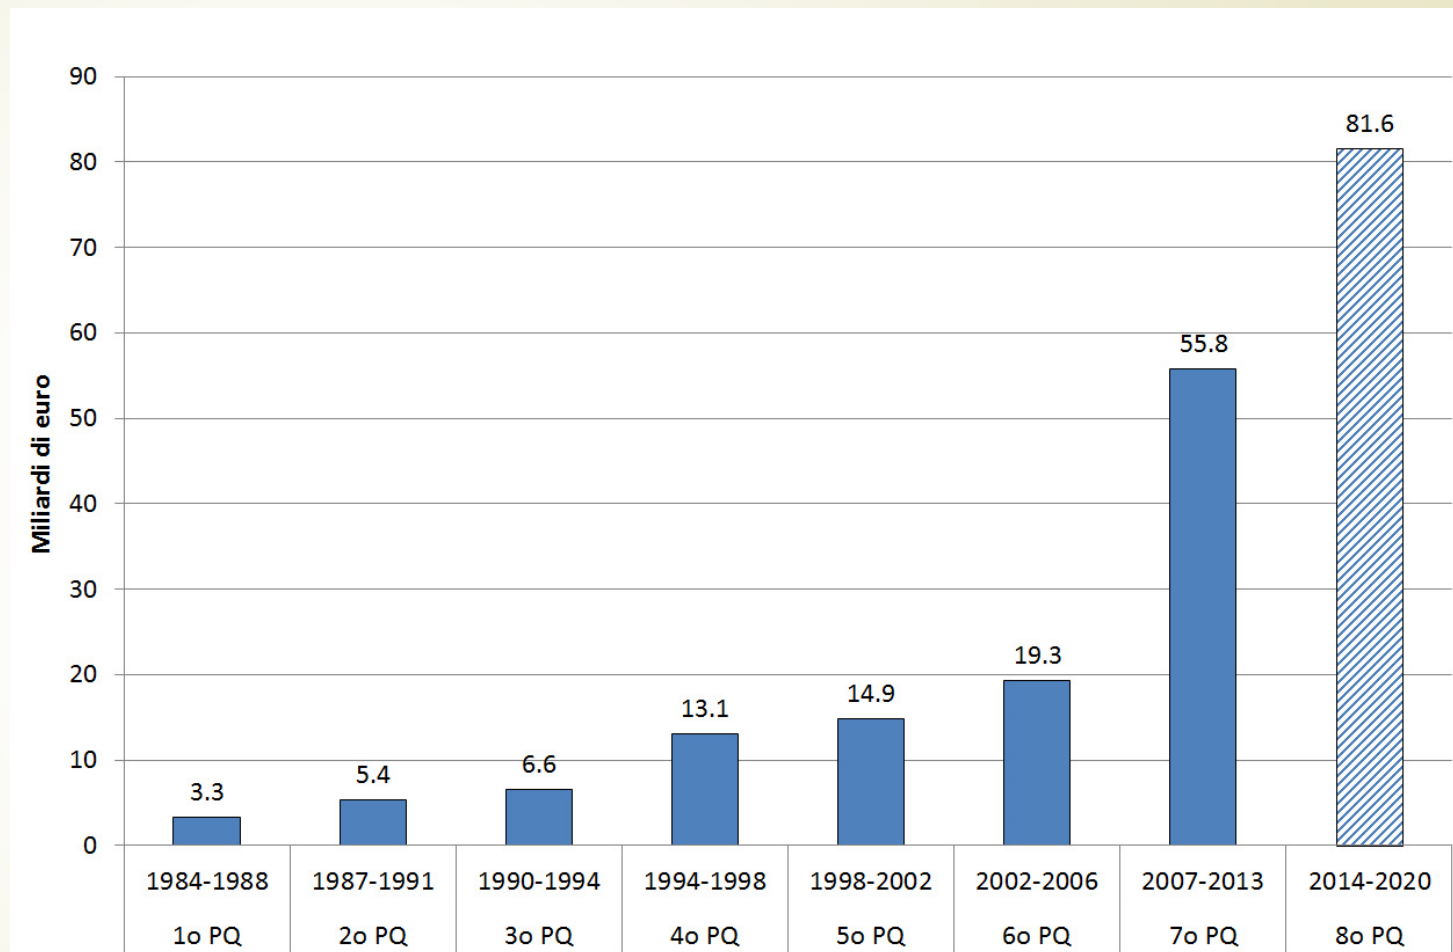

# Framework Programmes for Research and Technological Development (RTD)

- ▶ Until the 1950s provisions for research were included in the **European Coal and Steel Community** and the **European Atomic Energy Community** (Euratom) treaties
- ▶ Only in 1984 the first **framework programme (FP)** was created and approved...
- ▶ ... and it became the **main funding instrument** for research and innovation
- ▶ Since then, the European Union has run its research and innovation policy and funding on the basis of **multiannual framework programmes**

# The first framework programme

- The 1st Framework Programme lasted 5 years from 1984 to 1988
- The sectors involved were energy (largely nuclear fission) – which absorbed 50% of the budget –, information and communication technologies (ICT, 25%), industry and materials (11%), science of life and the environment (10%)
- Part of the funds were intended for mobility and scholarships
- The total budget was 3.75 billion euros
