

SEMINAR

As anticipated on **Thursday, May 4 at 4:30 p.m. in Room 1_B** within the learning activities planned within the course of "*Programmazione e controllo di gestione*" the **Structure of the Danieli Group's "Management Control System"** will be examined. It will be illustrated by two authoritative managers of the Group: **Dr. Michele Marinutti**, EVP Management Control & ICT and Danieli Executive Board Member and **Dr. Matteo Cicogna**, Head of Business Controllers.

The presentation will be followed by a group activity in which students will be involved in the analysis of two concrete "business cases" related to the group management control system.

All activities will be held in Italian

To encourage more interaction, I suggest reading Albero Bubbio's article, "*Progettare un controllo di gestione strategico. Possibili linee guida*" which I will include on the Moodle page in the section on non-mandatory material.
