

Problemi col Signal Tap Analyzer:

1)

Nella versione web (gratuita) il signal Tap analyzer non parte se non si attiva l'opzione TalkBack.

Può infatti comparire il seguente messaggio di errore

Per ovviare all'inconveniente :

Software: Quartus II Linux, Quartus II PC

Title

How do I enable the SignalTap II Logic Analyzer in the Quartus II Web Edition software?

Description

The SignalTap® II Logic Analyzer is available in the Quartus® II Web Edition only if the TalkBack feature is enabled.

To enable the TalkBack feature in the Quartus II GUI, follow these steps:

1. On the Tools menu, select **Options**.
2. In the Options window, select **Internet Connectivity**.
3. In the Internet Connectivity dialog window, click **TalkBack Options**.
4. In the TalkBack Options window, enable **Turn on the Quartus II software TalkBack feature**.

To enable the TalkBack feature outside the Quartus II GUI, follow these steps:

1. Browse to the Quartus II software installation directory (version 1.1 or above).
2. In the *<Quartus II installation directory>/bin* folder, execute **qtb_install.exe**.
3. In the **Enable** tab, read the TalkBack Feature Notice.
4. Enable **Turn on the Quartus II software TalkBack feature** then click **OK**.
