Greek and Roman Materials
Primary and secondary sources for the study of ancient Greece and Rome

Art & Archaeology Artifact Browser
Look through a massive library of art objects, sites, and buildings. The library's catalogs document 1305 coins, 1909 vases, 2003 sculptures, 179 sites, 140 gems, and 424 buildings. Each catalog entry has a description of the object and its context; most have images. Descriptions and images have been produced in collaboration with many museums, institutions, and scholars. Catalog information and keywords have been taken from standard sources, which are cited in the entries for each object.

Arabic Materials
Arabic language documents

Germanic Materials
Materials for the study of the Germanic Peoples

19th-Century American
Sources on the history of the 19th-century United States.

Renaissance Materials
Primary and secondary sources in early modern English literature

Richmond Times Dispatch
Issues of the Richmond Times Dispatch.

Humanist and Renaissance Italian Poetry in Latin
Latin poems produced in Italy or in Italian cultural environments during the period starting from around the birth of Dante until the first half of the sixteenth century.

Internet Ancient History Sourcebook

Editor: Paul Halsall

The Internet Ancient History Sourcebook has expanded greatly since its creation in 1998, and now contains hundred of local files as well as links to source texts throughout the net.

- See Introduction for an explanation of the Sourcebook's goals.
- See the Help! page for all the help on research I can offer

The Ancient History Sourcebook works as follows:

- This Main Index page shows all sections and sub sections. These have also been regularized in a consistent hierarchy. This should allow rapid review of where texts are.
- To access the sub-section pages, simply browse the sections below and select the highlighted section title.
- The navigation bars on the left also offers links to each sub-section

Additional Study/Research Aids

In addition to the above structure, there are a series of pages to help teacher and students.

- Ancient History in the Movies.

Bad Links

1. This project is both very large and fairly old in Internet terms.At the time it was begun (1996), it was not clear that web sites
[and the documents made available there] would often turn out to be transient. As a result there is a process called "link rot" -

Support the future of papyri.info!

Papyri.info has two primary components. The **Papyrological Navigator** (PN) supports searching, browsing, and aggregation of ancient papyrological documents and related materials; the **Papyrological Editor** (PE) enables multi-author, version controlled, peer reviewed scholarly curation of papyrological texts, translations, commentary, scholarly metadata, institutional catalog records, bibliography, and images.

Papyri.info aggregates material from the Advanced Papyrological Information System (APIS), Duke Databank of Documentary Papyri (DDbDP), Heidelberger Gesamtverzeichnis der griechischen Papyrusurkunden Ägyptens (HGV), Bibliographie Papyrologique (BP), and depends on close collaboration with Trismegistos, for rigorous maintenance of relationship mapping and unique identifiers. Work is in progress to incorporate content from the Arabic Papyrological Database (APD) as well. ...read more.

geographic distribution of the entered inscriptions

The *Epigraphic Database Heidelberg* contains the texts of **Latin and bilingual** (i.e. Latin-Greek) **inscriptions of the Roman Empire**. The epigraphic monuments are collected and kept up to date on the basis of modern research. With the help of seach functions specific queries can be carried out - e.g. a search for words in inscriptions and / or particular descriptive data. The seach results are often displayed together with photos and drawings.

The geographic focus is provided by the provinces of the Roman Empire. The total number of records rises continuously.

The Research Project is made up of three constituent databases

- ↗ Epigraphic Text Database (↗ last update)
- ↗ Photographic Database (↗ last update)
- ↗ Bibliographic Database (↗ last update)

http://edh-www.adw.uni-heidelberg.de

A fourth constituent database for the collection of geographic coordinates is at present under construction.

The Roman Inscriptions of Britain
by R.G. Collingwood and R.P. Wright
An Epitome

Volume 1 - The Inscriptions on Stone

South England	Wales	North England	Northern Borders	Hadrian's Wall	Scotland & Antonine Wall	Milestones
1 - 283	284 - 574	575 - 729	730 - 1298	1299 - 2090	2091 - 2218	2219 - 2314

The information presented on these indexed pages has been summarized from the superb reference work *The Roman Inscriptions of Britain* - *Vol.I Inscriptions on Stone* by Prof. R.G. Collingwood and R.P. Wright (Oxford **1965**).

In the RBO version the following information is presented; the *R.I.B.* designation number and observed Latin text, the nature and condition of medium, the date and place of its discovery, its current whereabouts - whether in a museum, private collection, still *in situ*, lost, destroyed, *etc.* - the date of the inscription, where it may be ascertained, also whether the text has been restored. In addition, all of the place-name headings on the linked pages are clickable, and lead to separate pages on each location where many of the inscriptions have been translated. All translations are, however, the work of the RBO WebMaster, Togodumnus, upon whom all blame should be laid for any inherent mistakes.

Summary of 'Critical Signs' Used in RBO Version

• - symbol used as separator to indicate text on different parts of stone

... - indicates an entire line of text either indecipherable or missing

...xxx - indicates text missing on left of line or word, of any length

xxx... - indicates text missing on right

...xxx... - indicates text missing on both sides

xxx...xxx - indicates text missing in middle

[xxx] - indicates text deliberately deleted in antiquity but easily restored

Vindolanda Tablets Online

This online edition of the Vindolanda writing tablets, excavated from the Roman fort at Vindolanda in northern England, includes the following elements:

Tablets - a searchable online edition of the tablets (volumes I and II)

Exhibition - an introduction to the tablets and their context

Reference - a guide to aspects of the tablets' content

Help - navigation and using the site

Also available are highlights from the tablets.

The website is part of the Script, Image and the Culture of Writing in the Ancient World programme, supported by the Andrew W. Mellon Foundation. It is a collaborative project between the Centre for the Study of Ancient Documents and the Academic Computing Development Team, Oxford University.

Scholarly publications should refer to this site as:

Vindolanda Tablets Online http://vindolanda.csad.ox.ac.uk/

Editions of individual tablets may be cited in the form http://vindolanda.csad.ox.ac.uk/TVII-291 (*Tab. Vindol.* II 291)

Feedback: if you are using Vindolanda Tablets Online for teaching, research or general interest, please send us your comments on the site.
