Corrections: The values in the table were calculated for an inside temperature of 78°F (25.5°C) and an outdoor maximum temperature of 95°F (35°C) with an outdoor daily range of 21°F (12°C). The table remains approximately correct for other outdoor maximums (93 to 102°F, 34 to 39°C) and other outdoor daily ranges (16 to 34°F, 9 to 19°C), provided the outdoor daily average temperature remains approximately 85°F (29.4°C). If the room-air temperature is different from 78°F (25.5°C) and/or the outdoor daily average temperature is different from 85°F (29.4°C), see note 2, Table 16.5.
