

Lecture 24 – Client's perspective

What do we work for

- “Open science is the idea that scientific knowledge of all kinds should be openly shared as early as is practical in the discovery process.”

Michael Nielsen
OpenScience ASAP

- Open, FAIR, Linked, interoperable, linked, ... data
- Formats, models, metadata, identifiers, vocabularies, ... for resources
- Data management: the data providers side ...

Let's have a look at the consumer's end ...

A couple of examples

- CDS tutorial
