# Marine conservation targets

Distance of Europe's seas to Aichi target 11, 2016

Convention on Biological Diversity

Strategic Plan 2011-2020

A total of 12.1 % of the surface of Europe's seas was designated as marine protected areas (EEA, 2023)

# EU MPAs in a nutshell

**Near shore (0-1 NM)**

**44.3 %**

**(165 301 km<sup>2</sup>)**

**Territorial (1-12 NM)**

**8.6 %**

**(856 125 km<sup>2</sup>)**

**Offshore (12 NM-END)**

**7.2 %**

**(4 769 289 km<sup>2</sup>)**

**Most of protected surface is in coastal areas, whereas territorial waters and offshore areas are poorly covered. Most of MPAs extend for less than 5 km<sup>2</sup>**

# Natura 2000 Sites

**Sites of Community Importance (SCI)** – marine SCI are basically *Posidonia oceanica* meadows ('SIC')

**Specially Protected Areas (SPA)** – related to birds (mostly transitional environments) ('ZPS')

**Special Areas of Conservation (SAC)** – species or habitats ('ZSC')

**SPAMI:** areas of importance for conserving the components of biological diversity in the Mediterranean Sea; contain ecosystems specific of the Mediterranean area or habitats of endangered species; areas of special interest at the scientific, aesthetic, cultural or educational levels.

Protocol concerning Specially Protected Areas and Biological Diversity in the Mediterranean (SPA/BD Protocol), the Contracting Parties to the Barcelona Convention established the List of Specially Protected Areas of Mediterranean Importance (RAC/SPA)

# Natura 2000 Sites

Natura 2000 area – Tutti

|  |           |
|--|-----------|
| Natura 2000 marine area (km <sup>2</sup> ) | 573,131   |
| Natura 2000 land area (km <sup>2</sup> )   | 784,994   |
| EU land area (km <sup>2</sup> )            | 4,376,978 |
| Natura 2000 land area (%)                  | 17.9      |

**Marine Natura 2000 sites covered about 573 000 km<sup>2</sup> or 9% of Europe's seas, although they are mainly in near-shore and coastal waters**

environment**

**Ecologically or biologically significant area**

# Ecologically or biologically significant areas

## What is an ecologically or biologically significant area (EBSA)?

An EBSA is an area of the ocean that has special importance in terms of its ecological and biological characteristics: for example, by providing essential habitats, food sources or breeding grounds for particular species. In 2008, a process to recognise these special areas was put in place by the United Nations Convention on Biological Diversity (CBD). Based on a set of seven scientific criteria, this process provides a framework to methodically and objectively describe those areas of the ocean that are crucial to the healthy functioning of the global marine ecosystem. EBSAs are areas of the ocean that are judged – through a technical process – to meet one or more of the following seven scientific criteria:

**Uniqueness or rarity**

**Special importance for life stages of species**

**Importance for threatened, endangered, or declining species or habitats**

**Vulnerability, fragility or slow recovery**

**Biological productivity/diversity**

**Naturalness**

# The Mediterranean Sea

There are 1,087 officially designated MPAs in the Mediterranean covering 209,303 km<sup>2</sup>, plus OECMs for a total of >1300 protected areas, which places a surface of 11.7% under a legal designation

About 900 sites are covered mostly due to the Natura 2000 at sea network which rarely affords strict restrictive measures and 186 are true MPAs.

## Mostly shallow waters

39.77% of *Posidonia* meadows and 32.78% of Mediterranean coralligenous communities are covered.

65.05% of MPAs of national designations have a marine surface of less than 50 km<sup>2</sup> (77.17% of all MPAs and OECMs), 69 nationally designated sites have a marine area smaller than 10 km<sup>2</sup> and 46 are larger than 100 km<sup>2</sup>.

78% of nationally designated MPAs are over 10 years old, which is considered the minimum age for an MPA to reach a certain maturity (even though the time required for an MPA to be effective varies greatly from one area to another) and 46 sites are over 20 years old.
