Art Vandalism

dr Olivia Rybak-Karkosz

University of Silesia in Katowice, Poland

- 
1. Introduction.
 2. Types of destruction and damage of art.
 3. Motivations of individual vandals.
 4. Serial art vandal.
 5. The most often attacked works of art.
 6. Possibilities of using criminalistic methods to protect monuments from vandalism.
 7. Conclusion.

Introduction

One of the oldest and most harmful threat to works of art.

Initially it was inextricable with conquests, wars and other conflicts.

Most often it is a part of looting art - the more valuable art is stolen and the rest - destroyed.

Typical forms of destruction and damage of art:

1. ideological vandalism
2. terrorism
3. individual vandalism
4. vandalism as side effect (to theft)

Atypical forms of vandalism:

1. ecological
2. graffiti
3. extravagant
4. archaeological sites

Buddha statues in Bamiyan

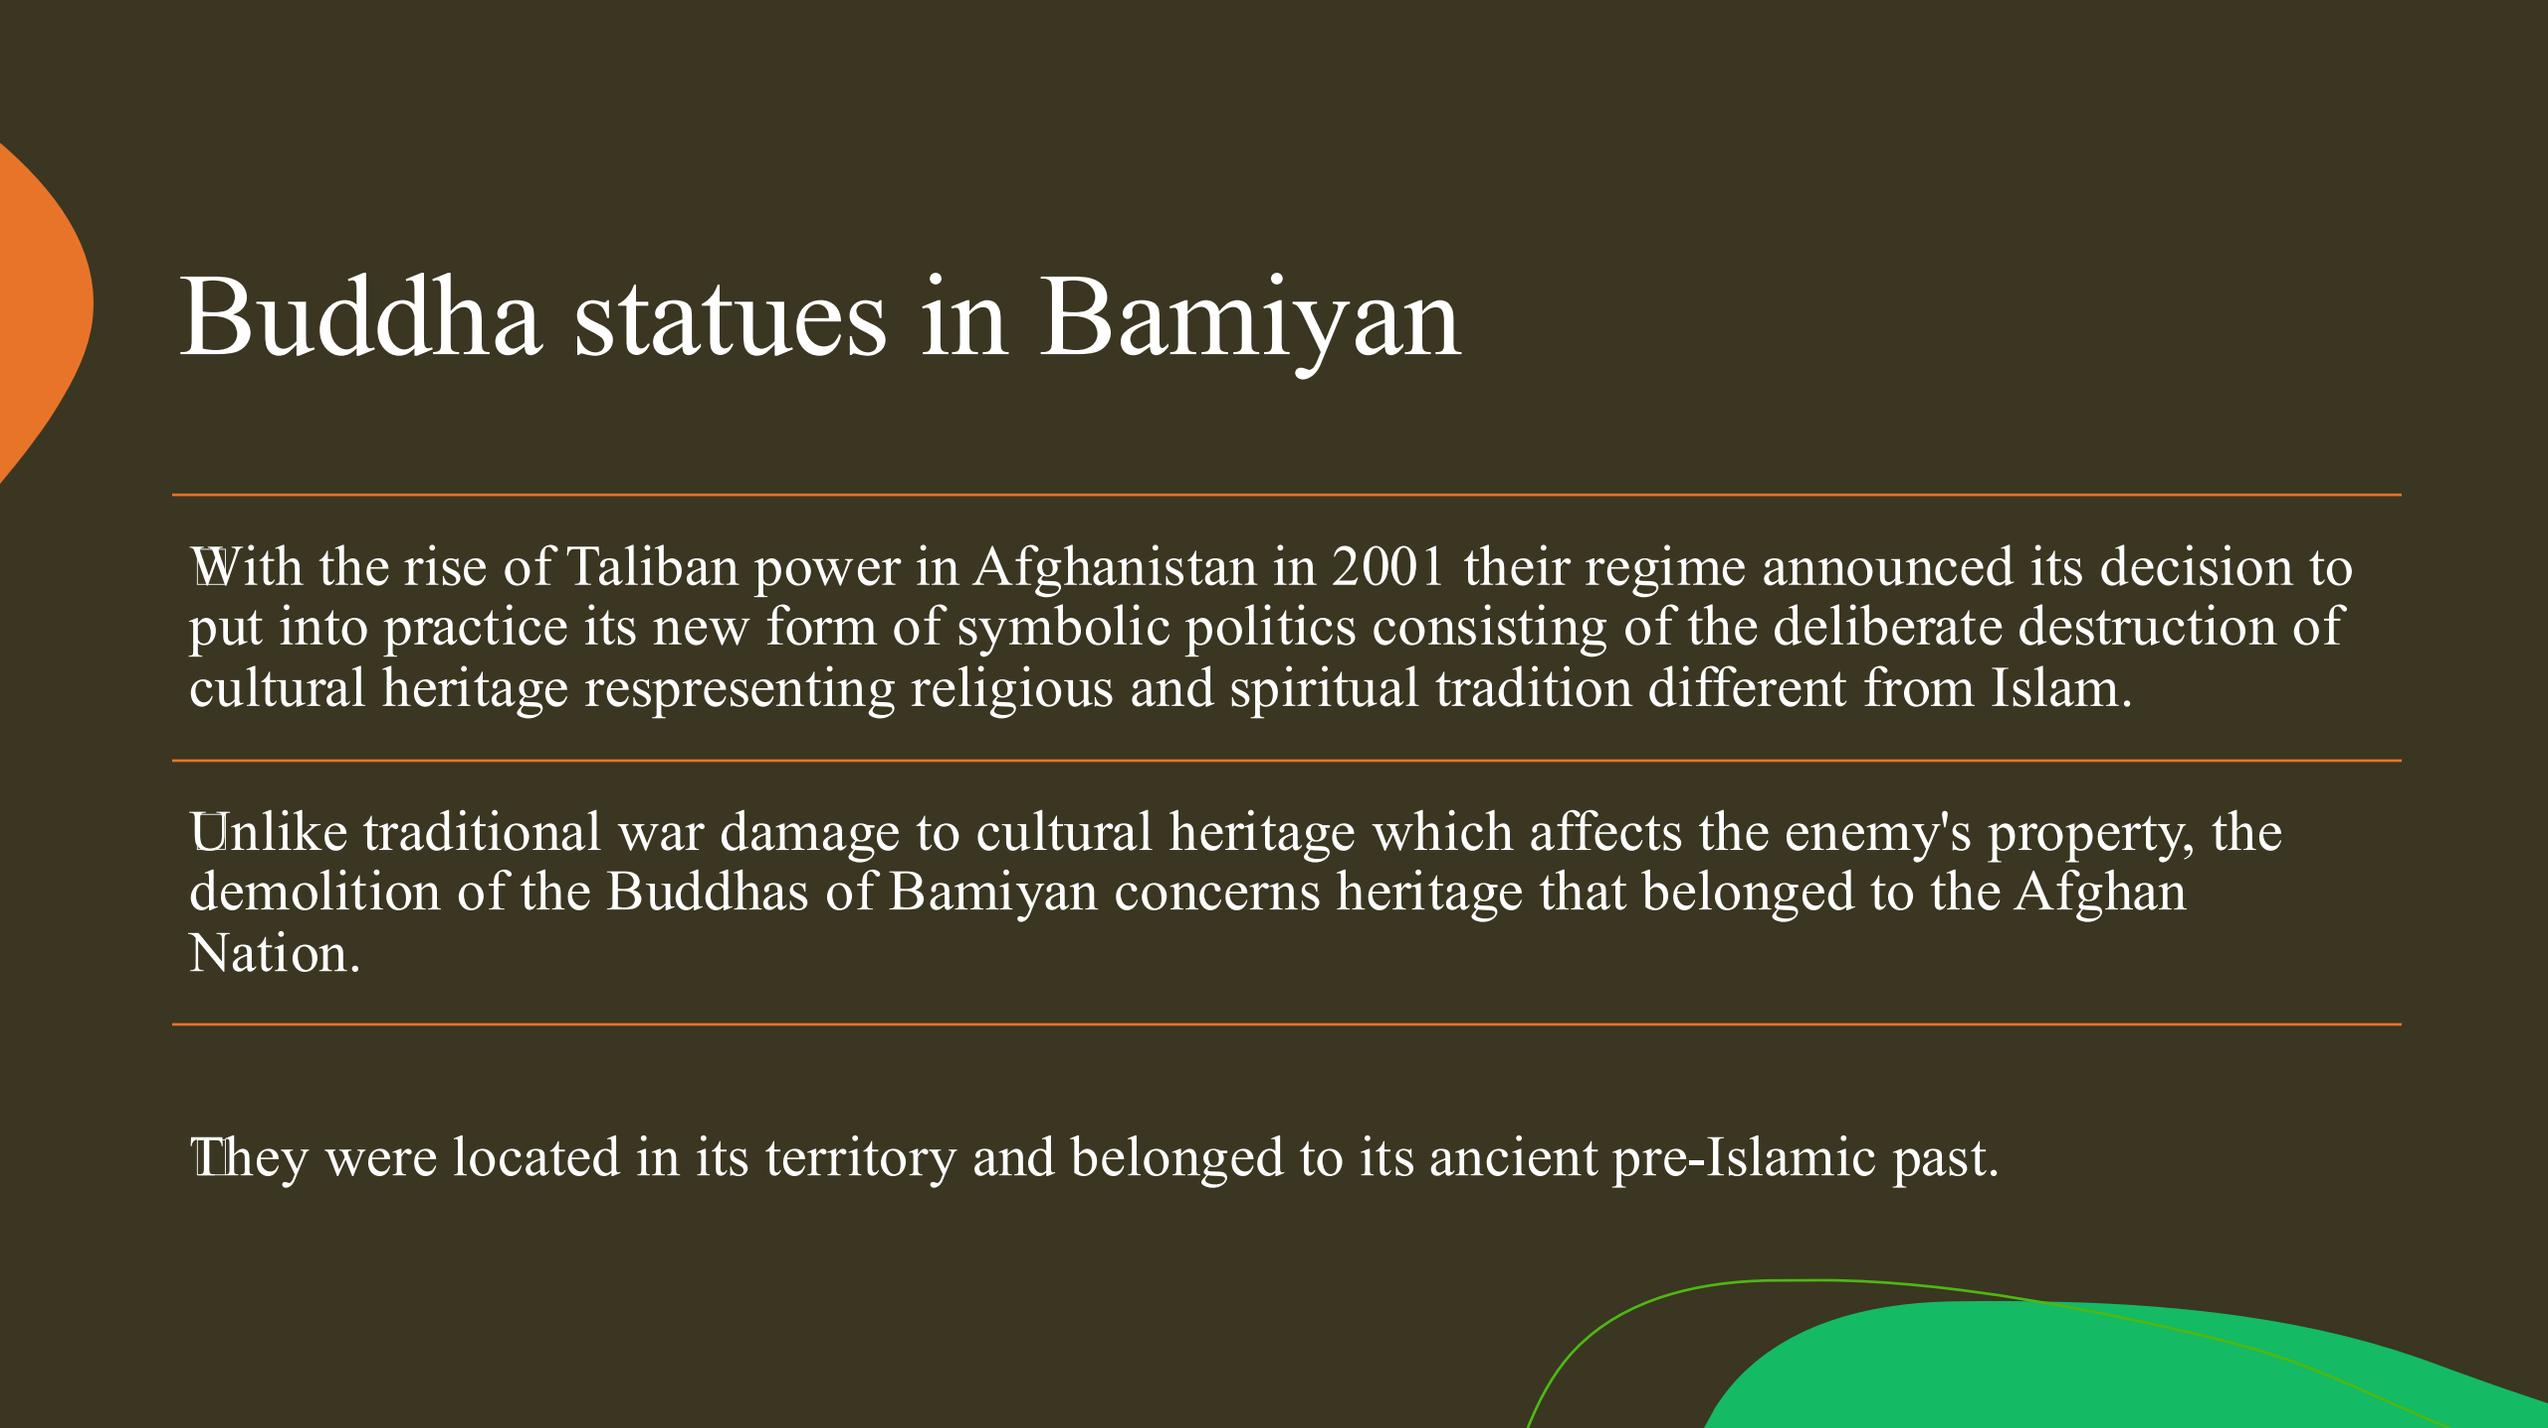

Buddha statues in Bamiyan

With the rise of Taliban power in Afghanistan in 2001 their regime announced its decision to put into practice its new form of symbolic politics consisting of the deliberate destruction of cultural heritage representing religious and spiritual tradition different from Islam.

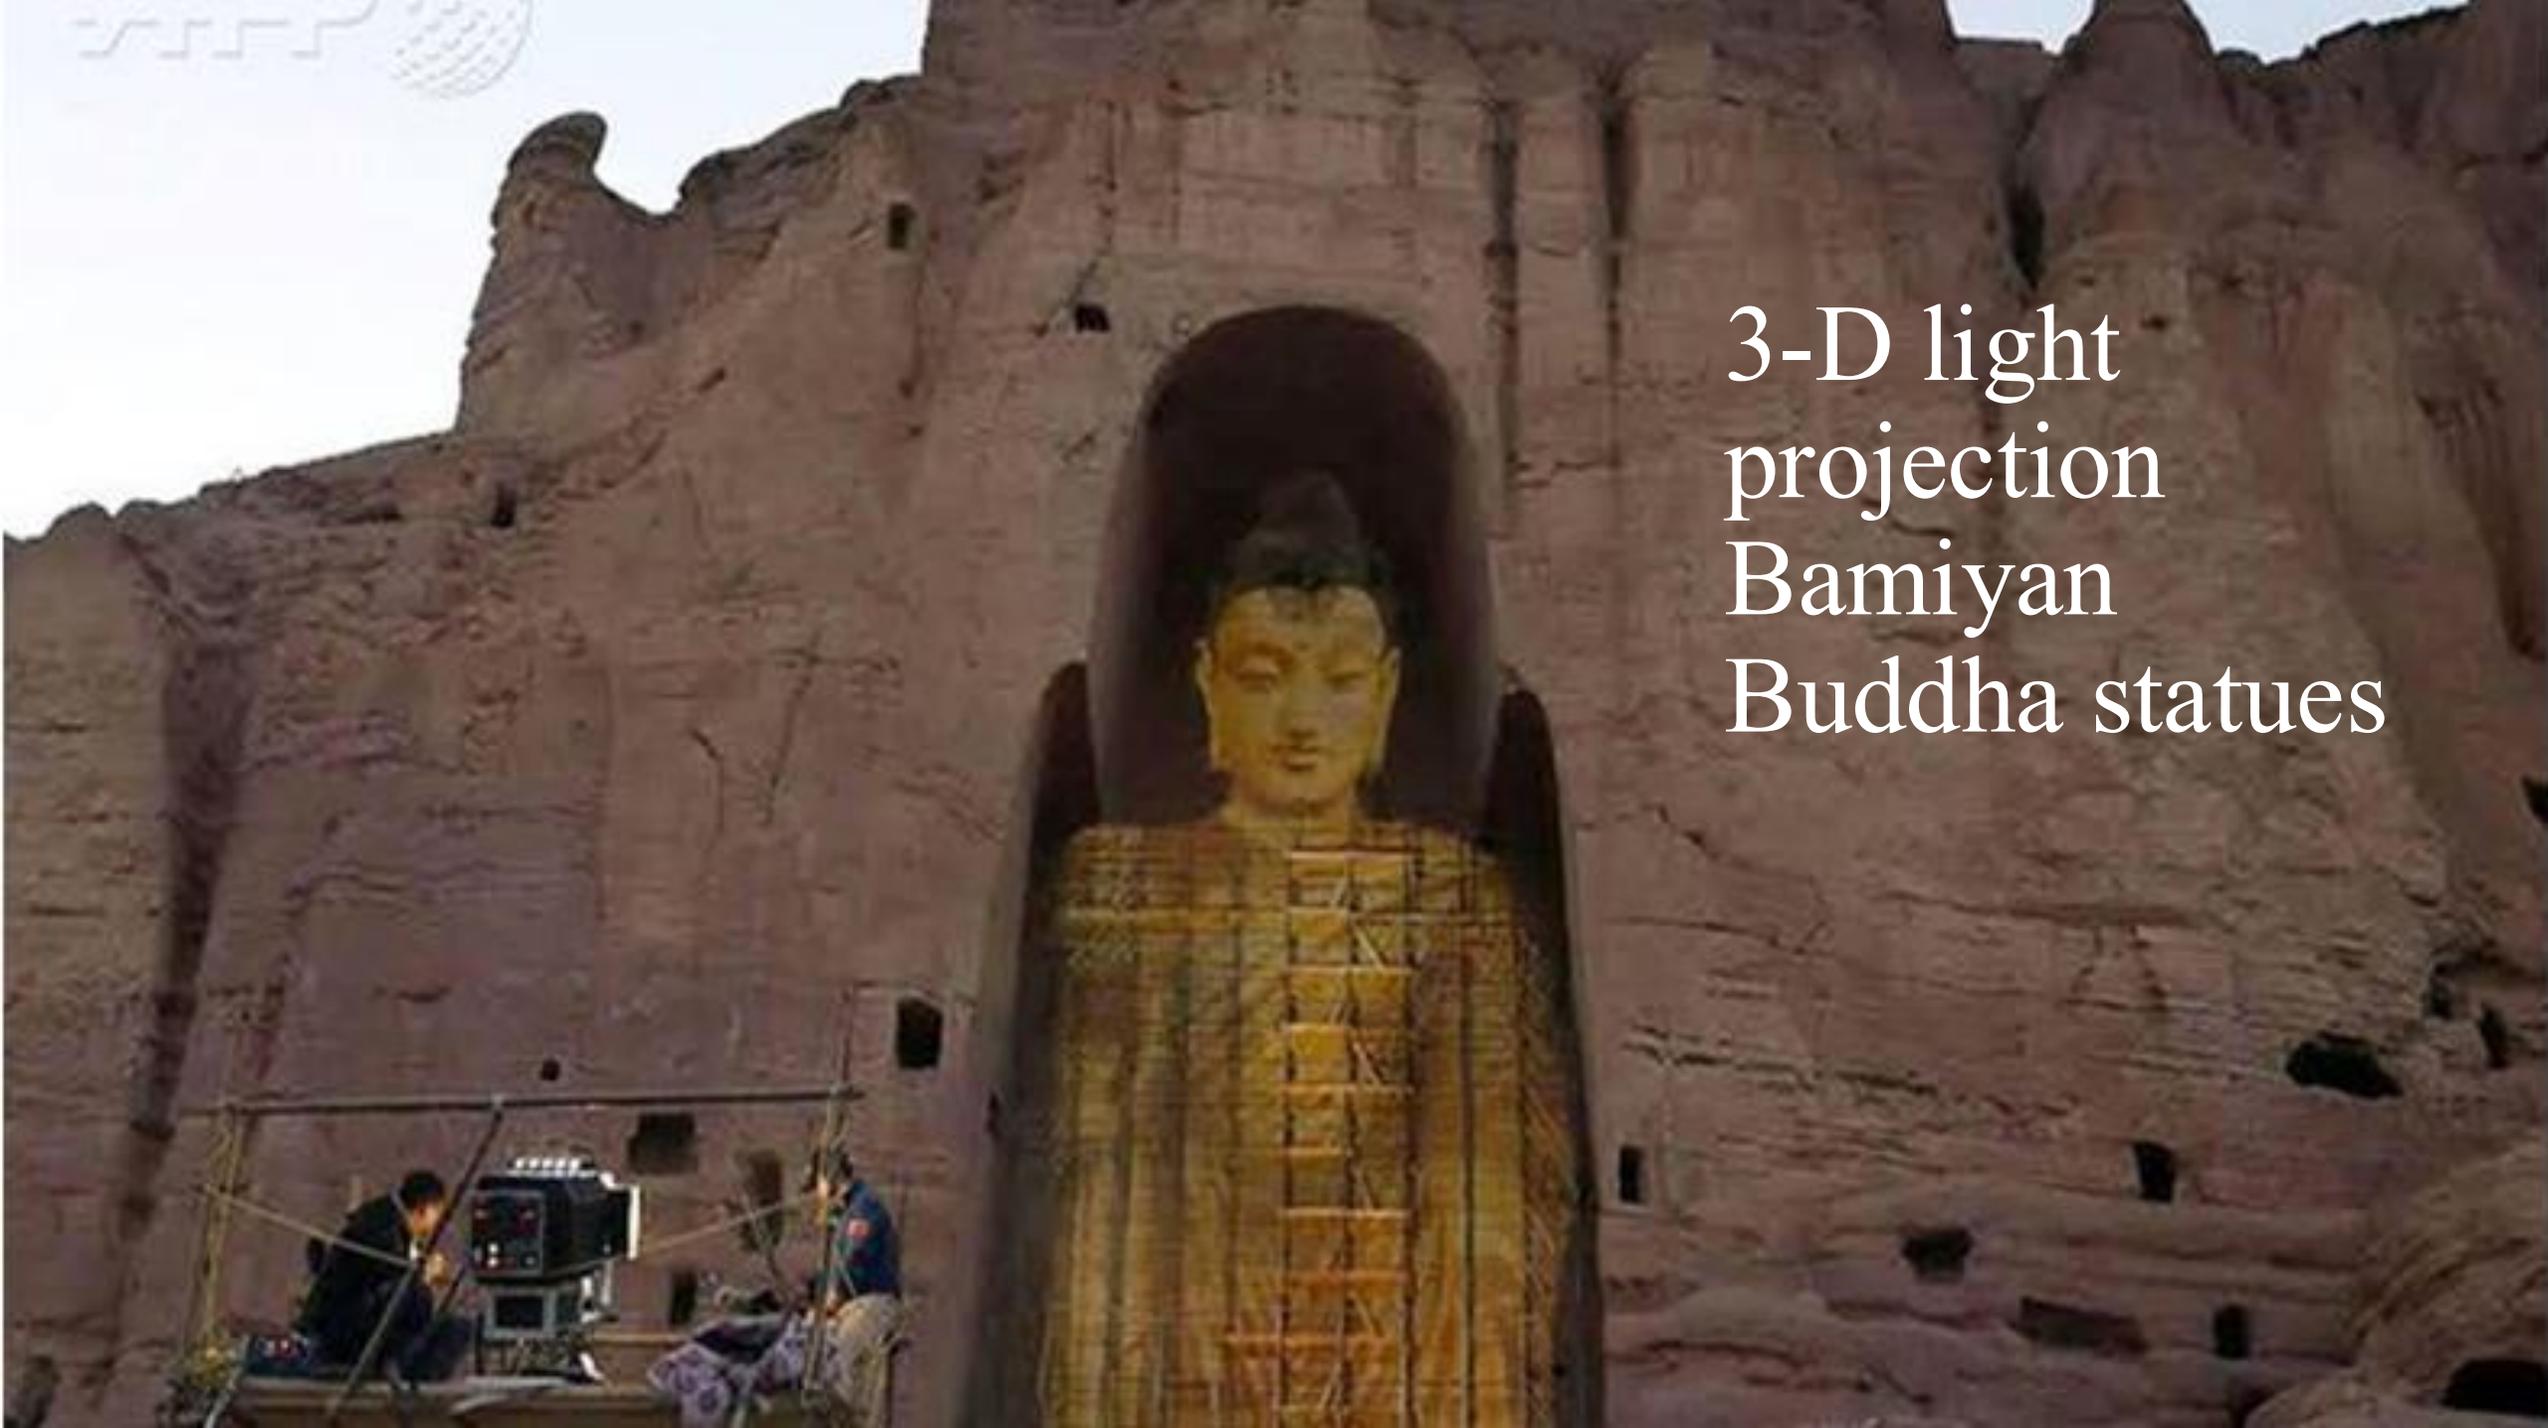

Unlike traditional war damage to cultural heritage which affects the enemy's property, the demolition of the Buddhas of Bamiyan concerns heritage that belonged to the Afghan Nation.

They were located in its territory and belonged to its ancient pre-Islamic past.

Typical forms of destruction and damage of art:

1. ideological vandalism
2. terrorism
3. individual vandalism
4. vandalism as side effect (to theft)

Atypical forms of vandalism:

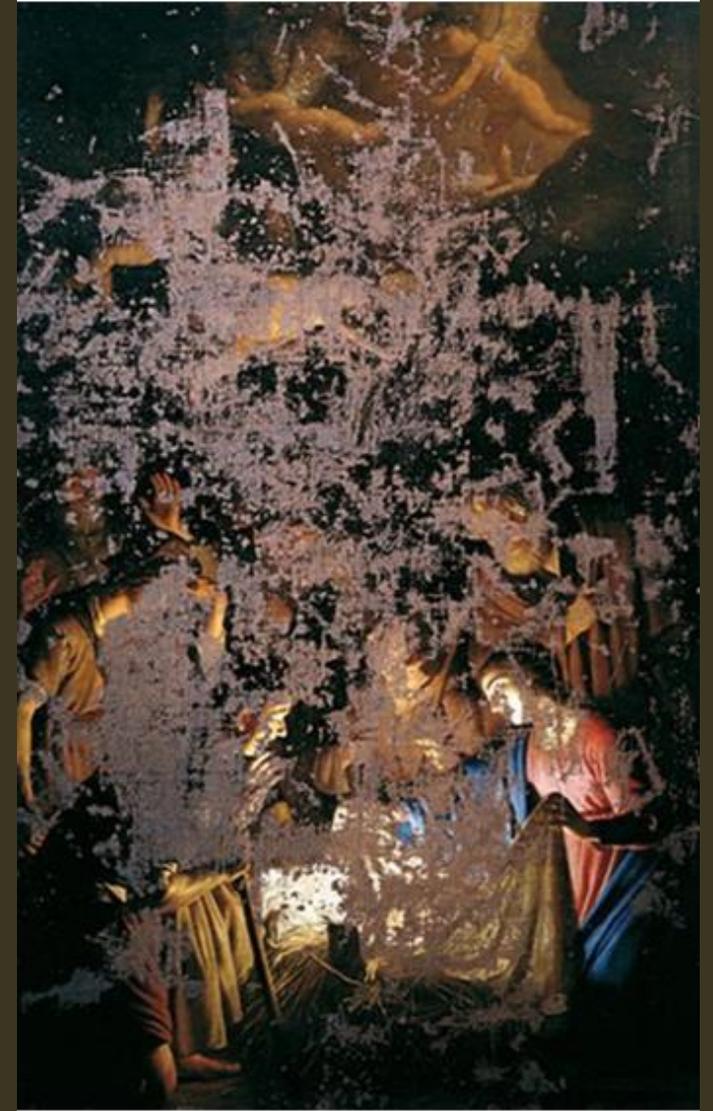

1. ecological
2. graffiti
3. extravagant
4. archaeological sites

Terrorism

- It's a specific form of destruction and damage towards heritage or cultural goods.
- It can be either directed towards monuments and works of art they are the target and are deliberately destroyed or are accidental casualty.
- Cultural good are symbols, bond of nation and its identity. And that's why they are sometimes terrorists targets.

bombing

Typical forms of destruction and damage of art:

1. ideological vandalism
2. terrorism
3. individual vandalism
4. vandalism as side effect (to theft)

Atypical forms of vandalism:

1. ecological
2. graffiti
3. extravagant
4. archaeological sites

3. individual vandalism

- A big threat to art works conducted in museum, galleries etc.
- Sometimes damage consists of leaving a minor scratch, a stuck chewing gum, a pencil mark and so on, and usually escapes publicity.
- Different motivations push the perpetrators to do such act and different tools are used.

Motivations of individual vandals

A. artistic:

vandalism as part of performance act

ignorance

manifesto

B. mental disorder

C. ideological:

political

religious

ecology

D. malicious destruction

E. other

Marcel Duchamp –
Fountain, 1917

Ecovandalism

- Modern activism?
- eco-protests targeting masterpieces at major museums
- Their actions are part of a growing climate protest movement in Europe
- “New oil and gas wells are a death sentence for humanity” - demands to end to new oil and gas projects (a stop to fossil fuel projects)
- The activists are part of the groups such as: Just Stop Oil, the Ultima Generazione group, Letzte Generation

Climate activists in Italy glue themselves to ancient Vatican Museums sculpture

**Serial art
vandal -
Hans-Joachim
Bohlmann**

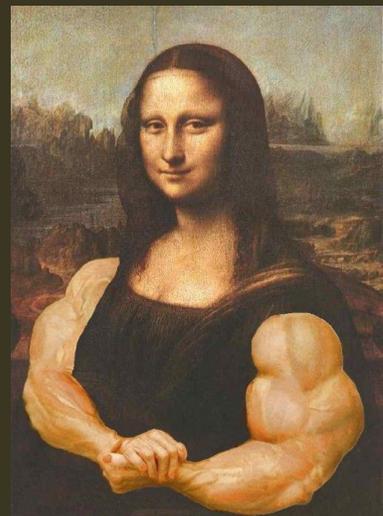

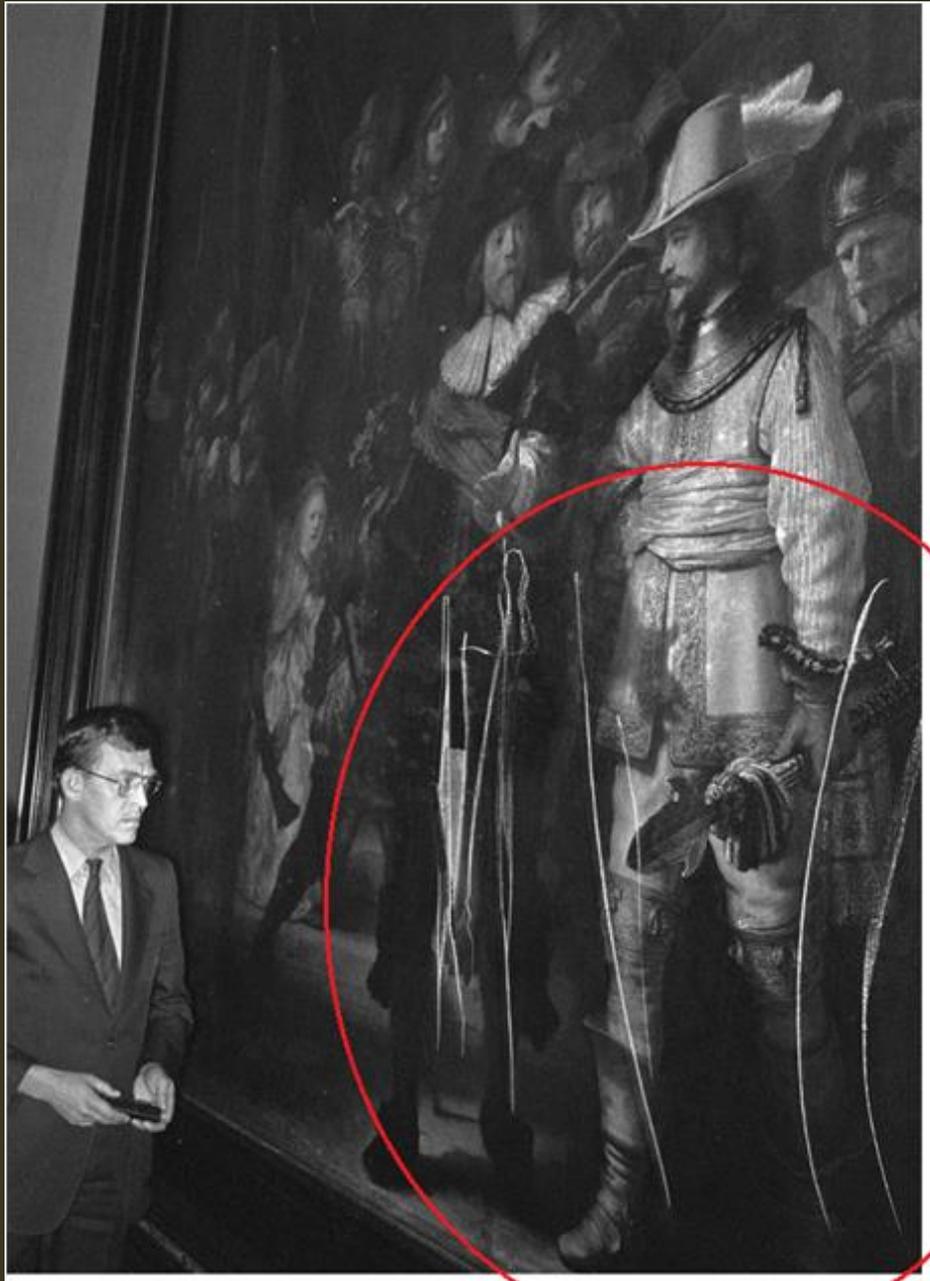

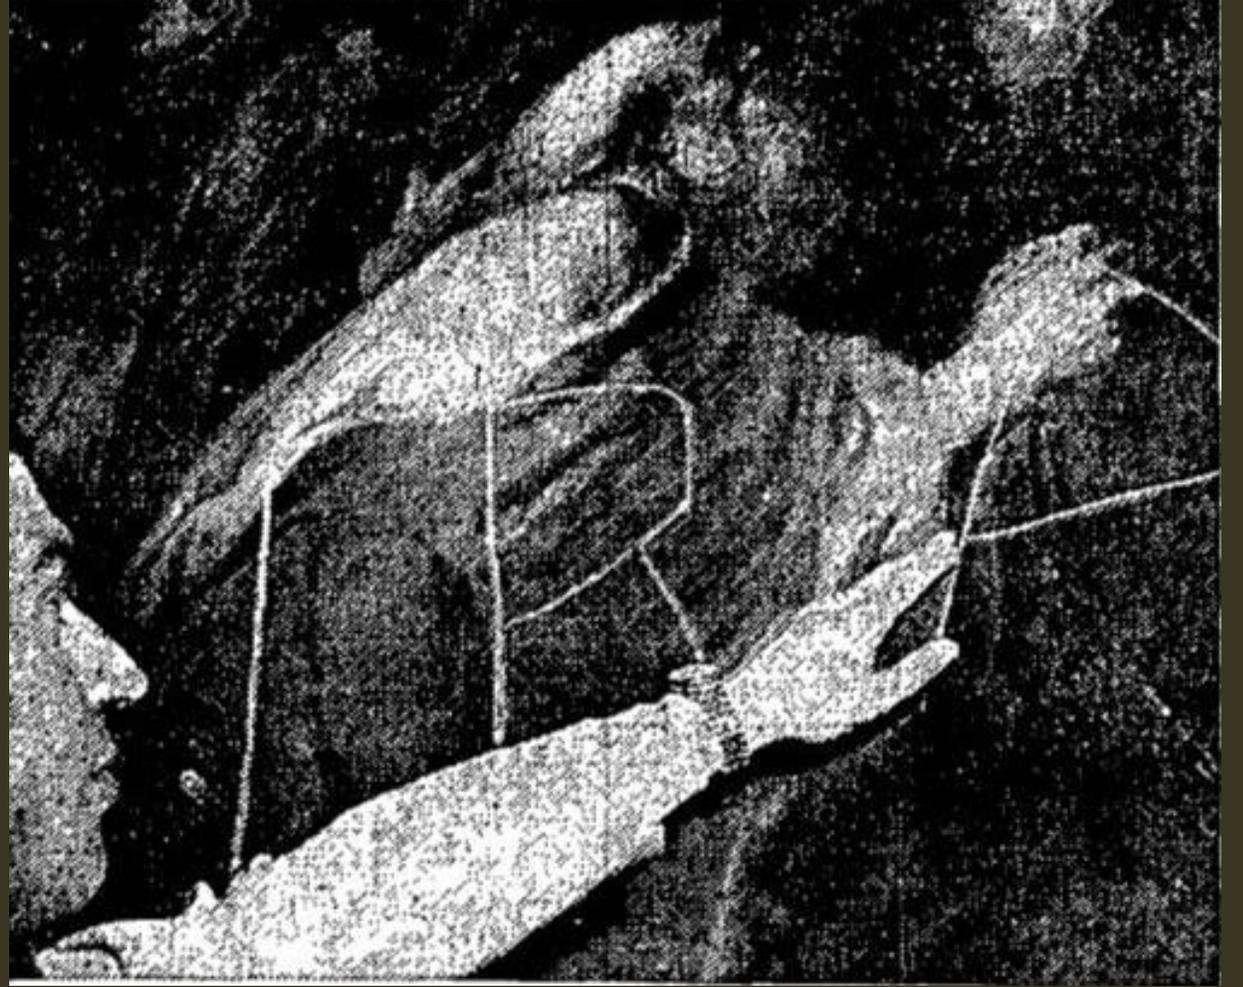

The most often attacked works of art

- Newman's *Who's Afraid of Red, Yellow, and Blue III*
- Rembrandt's *The Night Watch*
- Leonardo da Vinci's *Mona Lisa*
- Rubens's *Adoration of Magi*

Typical forms of destruction and damage of art:

1. ideological vandalism
2. terrorism
3. individual vandalism
4. vandalism as side effect (to theft)

Atypical forms of vandalism:

1. ecological
2. graffiti
3. extravagant
4. archaeological sites

Atypical forms of vandalism

ecological - uncontrollable pollution of environment caused irreversible destruction of many cultural goods.

Destruction caused by acid rain

Typical forms of destruction and damage of art:

1. ideological vandalism
2. terrorism
3. individual vandalism
4. vandalism as side effect (to theft)

Atypical forms of vandalism:

1. ecological
2. graffiti
3. extravagant
4. archaeological sites

Atypical forms of vandalism

graffiti

it is a **play vandalism** (often motivated by boredom) and **ideological vandalism** combined together.

- contains every form of expression: pictures, signatures or drawings. Sometimes it is placed on cultural goods and monuments and might cause a serious damage.
- an action involving the unauthorized marking of public space by an individual or group.

of historical
Czartoryski Palace
in Puławy

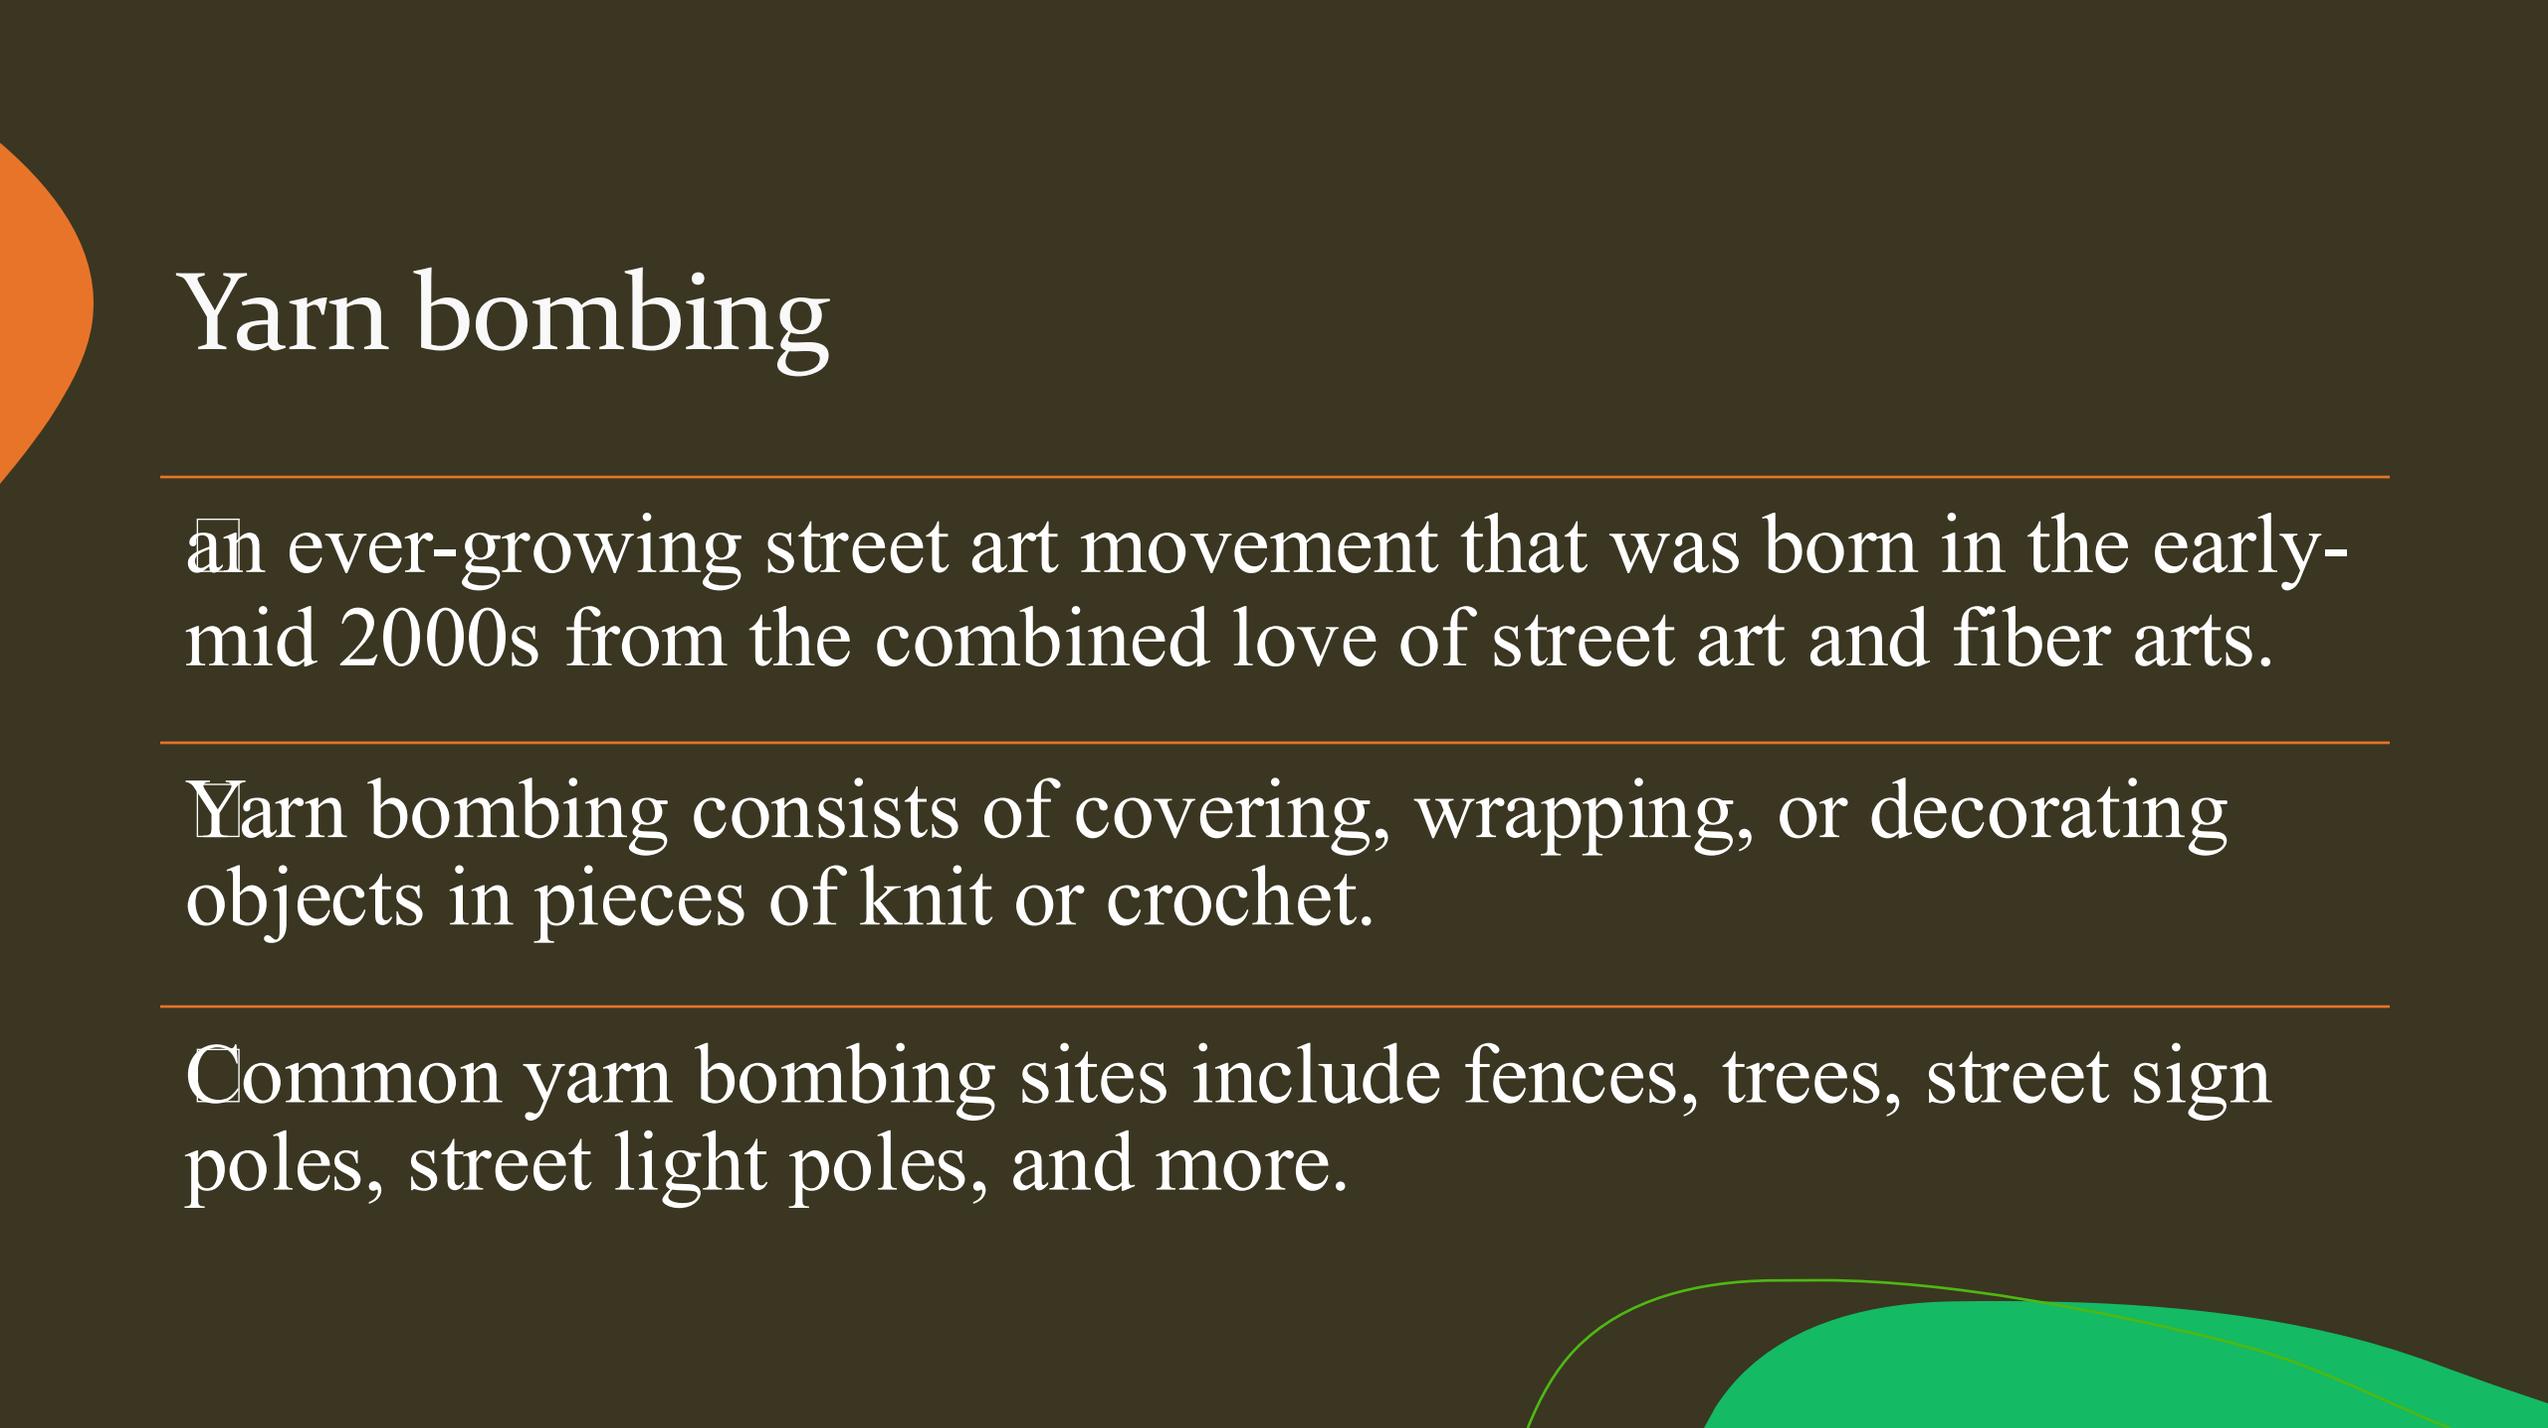

Graffiti on Gate House,
Old Oliwa Market

Yarn bombing

an ever-growing street art movement that was born in the early-mid 2000s from the combined love of street art and fiber arts.

Yarn bombing consists of covering, wrapping, or decorating objects in pieces of knit or crochet.

Common yarn bombing sites include fences, trees, street sign poles, street light poles, and more.

Street art that washes in the rain

Typical forms of destruction and damage of art:

1. ideological vandalism
2. terrorism
3. individual vandalism
4. vandalism as side effect (to theft)

Atypical forms of vandalism:

1. ecological
2. graffiti
3. extravagant
4. archaeological sites

Atypical forms of vandalism

extravagant

the actions taken by public figures actors, politicians etc. towards works of art publicly displayed.

The destruction of
Mauricio Cattelan's
La Nona Ora

Typical forms of destruction and damage of art:

1. ideological vandalism
2. terrorism
3. individual vandalism
4. vandalism as side effect (to theft)

structure

Conclusion

- Destruction and damage is the most dangerous and serious crime against works of art.
- Very often the effect of such action is irretrievable. Sometimes it is possible to restore a damaged piece but when it comes to destruction the consequences are tragic and the loss is huge.
- Social danger of such crimes is great because loss is not only in money value but in cultural identity, artistic or historical value as well.
- Sometimes the loss is priceless and final.

Criminalistics methods used to protect monuments from vandalism

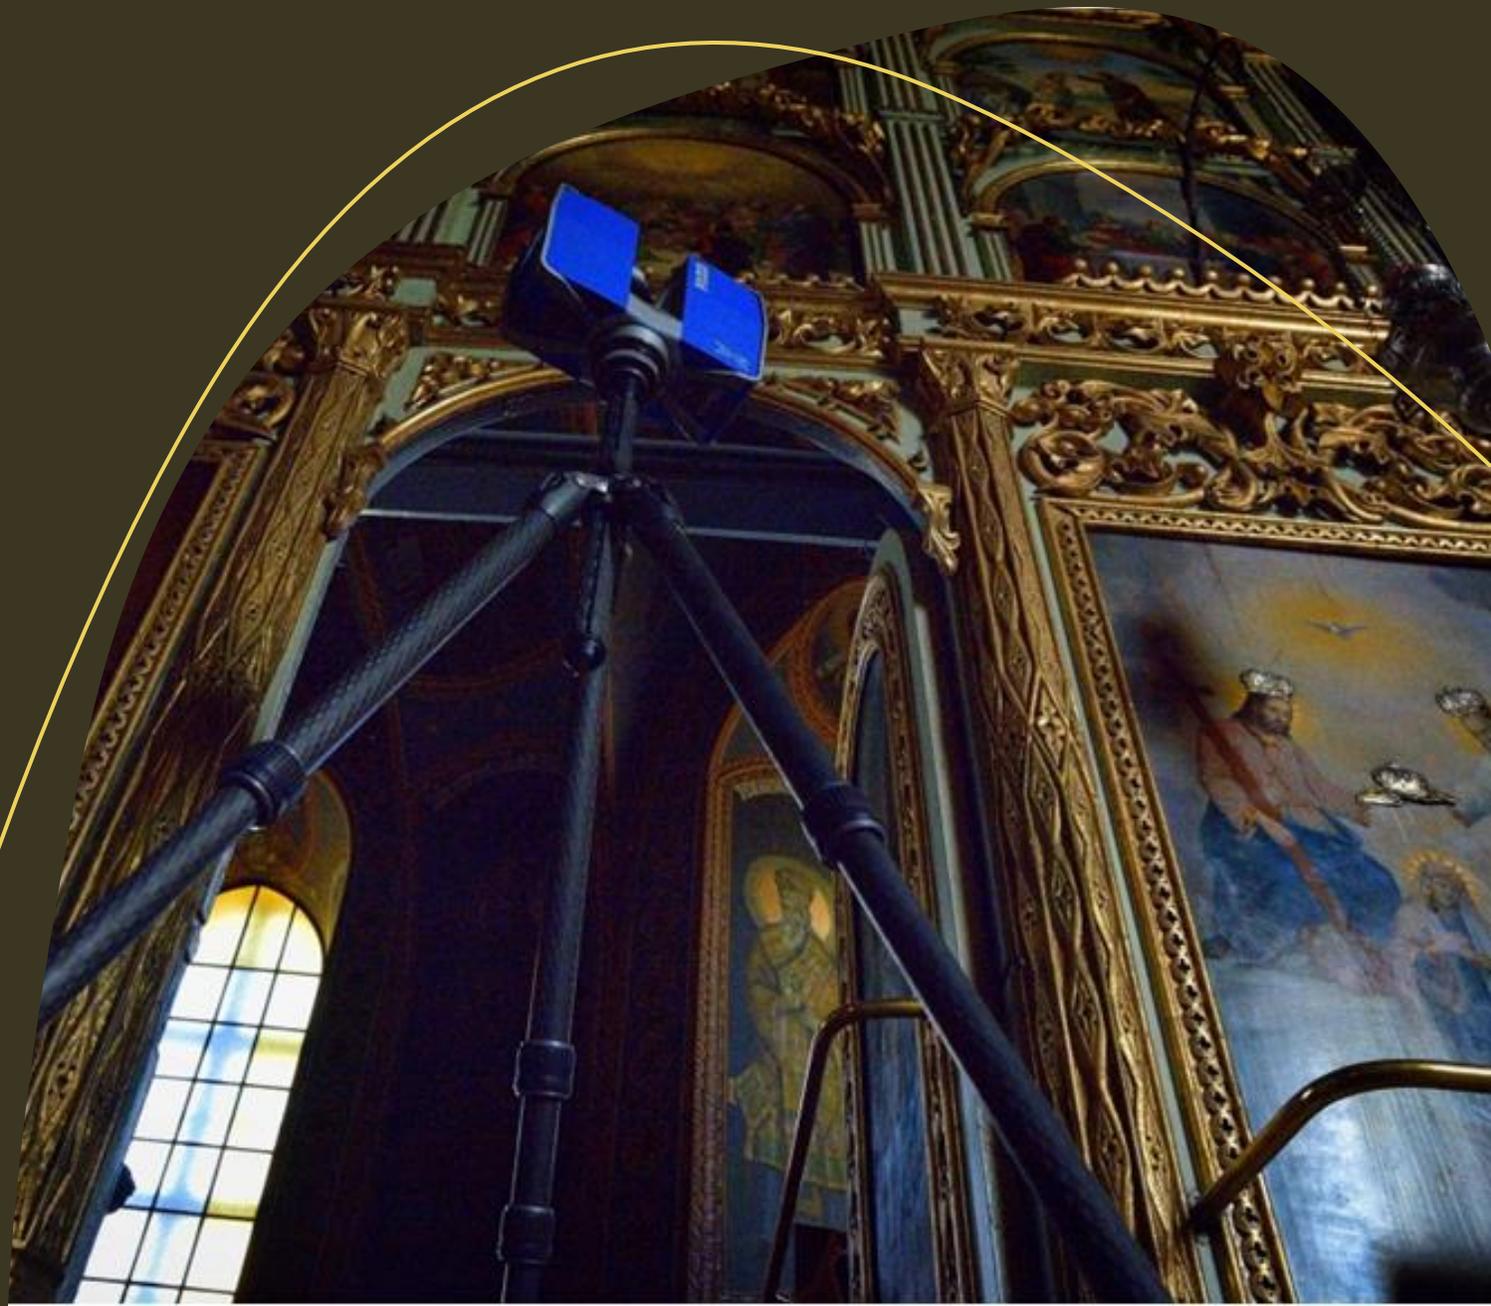

There are two directions:

1. full monument registration (3d scanning, inventory, complex database, registry)
2. protection from destruction

The 3D laser scanning

- The 3D laser scanning method is the safe and easy way to have complete digital information about any building and historical monument in the cultural and natural heritage.
- The digital copy of the monument or historical building from the built heritage contributes to:
 - conservation and protection of national heritage;
 - developing and promoting tourism in the region;
 - preserving, in the most accurate and safe way, the patrimony to future generations;

3D scanner

Databases

- *Object ID* which is an international standard for describing cultural objects. Having established the descriptive standard, the Object ID project now helps combat the illegal appropriation of art objects by facilitating documentation of cultural property and by bringing together organisations around the world that can encourage its implementation.
- *Stolen Works of Art* an Interpol's database - it combines descriptions and pictures of more than 50,000 items. It is the only database at the international level with certified police information on stolen and missing objects of art.
- But there isn't one database universal for all countries. There are postulates to create such database using *AFIS* (Automated Fingerprint Identification System) as an inspiration and starting point.

OBJECT ID CHECKLIST

TAKE PHOTOGRAPHS

Photographs are of vital importance in identifying and recovering stolen objects. In addition to overall views, take close-ups of inscriptions, markings, and any damage or repairs. If possible, include a scale or object of known size in the image.

ANSWER THESE QUESTIONS:

Type of Object

What kind of object is it (e.g., painting, sculpture, clock, mask)?

Materials & Techniques

What materials is the object made of (e.g., brass, wood, oil on canvas)?

How was it made (e.g., carved, cast, etched)?

Measurements

What is the size and/or weight of the object? Specify which unit of measurement is being used (e.g., cm., in.) and to which dimension the measurement refers (e.g., height, width, depth).

Inscriptions & Markings

Are there any identifying markings, numbers, or inscriptions on the object (e.g., a signature, dedication, title, maker's marks, purity marks, property marks)?

Distinguishing Features

Does the object have any physical characteristics that could help to identify it (e.g., damage, repairs, or manufacturing defects)?

Title

Does the object have a title by which it is known and might be identified (e.g., *The Scream*)?

Subject

What is pictured or represented (e.g., landscape, battle, woman holding child)?

Date or Period

When was the object made (e.g., 1893, early 17th century, Late Bronze Age)?

Maker

Do you know who made the object? This may be the name of a known individual (e.g., Thomas Tompion), a company (e.g., Tiffany), or a cultural group (e.g., Hopi).

WRITE A SHORT DESCRIPTION

This can also include any additional information which helps to identify the object (e.g., color and shape of the object, where it was made).

KEEP IT SECURE

Having documented the object, keep this information in a secure place.

Criminalistics methods used to protect monuments from vandalism

Ad. 2. There are different possible forms of protection:

1. Unmanned aerial vehicle also known as drone - allows aerial photography of archeological sites

2. Systems of preventing from various forms of crime:

- CCTV
- Fire Alarm System
- An Intrusion Detection and Prevention System
- Access Control System

3. The Graffitiage project financed by EU - Development of a new antigraffiti system, based on traditional concepts, preventing damage of architectural heritage materials
