

BBC WEATHER - LONDON

<https://www.bbc.com/weather/>

Today

This morning will see increasing clouds and winds. This afternoon will see spells of rain develop from the southwest. A milder day.

Tonight

Tonight will see outbreaks of rain early. However, it will soon turn drier with the odd clear spell possible. Some patchy light rain or drizzle cannot be ruled out. A milder night.

Wednesday

Tomorrow will start mainly dry with the odd bright spell possible. However, it will soon become wet with showery spells of rain moving in from the south-west. Breezy and trending milder.

Outlook for Thursday to Saturday

Thursday morning will see largely bright skies with a few patches of cloud and the odd shower at times. It will be turning cloudier in the afternoon with further showers expected. Dry on Friday with variable cloud in the morning but it will be turning largely bright in the afternoon. Remaining dry on Saturday with largely cloudy skies and a few bright spells.

PREVISIONE METEO
